

An h1 header

Paragraphs are separated by a blank line.

2nd paragraph, *italic*, **bold**, and `monospace`. Itemized lists look like:

- this one
- that one
- the other one

Note that --- not considering the asterisk --- the actual text content starts at 4-columns in.

Block quotes are written like so.

They can span multiple paragraphs, if you like.

Use 3 dashes for an em-dash. Use 2 dashes for ranges (ex., "it's all in chapters 12--14"). Three dots ... will be converted to an ellipsis. Unicode is supported. ^{if*}

An h2 header

Here's a numbered list:

1. first item
2. second item
3. third item

Note again how the actual text starts at 4 columns in (4 characters from the left side). Here's a code sample:

```
# Let me re-iterate ...
for i in 1 .. 10 { do-something(i) }
```

As you probably guessed, indented 4 spaces. By the way, instead of indenting the block, you can use delimited blocks, if you like:

```
--- define foobar() {
print "Welcome to flavor country!";
} ---
```

(which makes copying & pasting easier). You can optionally mark the delimited block for Pandoc to syntax highlight it:

```
~~~python import time
```

Quick, count to ten!

```
for i in range(10):  
  
    # (but not *too* quick)  
    time.sleep(0.5)  
    print(i)  
  
----
```

An h3 header

Now a nested list:

1. First, get these ingredients:
 - carrots
 - celery
 - lentils
2. Boil some water.
3. Dump everything in the pot and follow this algorithm:

```
find wooden spoon  
uncover pot  
stir  
cover pot  
balance wooden spoon precariously on pot handle  
wait 10 minutes  
goto first step (or shut off burner when done)
```

Do not bump wooden spoon or it will fall.

Notice again how text always lines up on 4-space indents (including that last line which continues item 3 above).

Here's a link to a website, to a local doc, and to a section heading in the current doc. Here's a footnote [^]. footnote text.

Tables can look like this:

Name Size Material Color

All Business 9 leather brown Roundabout 10 hemp canvas natural Cinderella 11 glass transparent

Table: Shoes sizes, materials, and colors.

(The above is the caption for the table.) Pandoc also supports multi-line tables:

Keyword Text

red Sunsets, apples, and

other red or reddish
things.

green Leaves, grass, frogs

and other things it's
not easy being.

A horizontal rule follows.

Here's a definition list:

apples : Good for making applesauce.

oranges : Citrus!

tomatoes : There's no "e" in tomatoe.

Again, text is indented 4 spaces. (Put a blank line between each term and its definition to spread things out more.)

Here's a "line block" (note how whitespace is honored):

| Line one | Line too | Line tree

and images can be specified like so:

example image

Inline math equation: $\Omega = d\phi / dt$. Display math should get its own line like so:

$$\Omega = \int \rho R^2 dV$$

And note that you can backslash-escape any punctuation characters which you wish to be displayed literally, ex.: 'foo', *bar*, etc.
